SUMMARY

- As an Information Technology student, I am passionate about and aim to build a career as a full-stack developer. I aspire to apply my knowledge to contribute to the company while gaining practical experience, enhancing my expertise, and improving teamwork skills.

ADDITIONAL INFORMATION

Technical Skills:

- Programming:** Algorithms, Data Structures, NodeJS, JavaScript, Java, Python, C/C++, ReactJS
- Databases:** MongoDB, SQL Server, MySQL
- Tools & APIs:** RESTful API, WebSocket, Git/GitHub, Postman

Soft Skills: Problem-solving, Adaptability, Diligence, Proactivity

Languages: English (Intermediate)

EDUCATION

Fourth-year student

2021 - Present

University of Transport and Communications - Campus in Ho Chi Minh City

GPA: 3.18

ACTIVITIES

- Participated in the University's Olympic in Informatics competition 2024
- Engaged in scientific research supervised by the Department of Information Technology 2023 - 2024

PROJECTS

UTC2 Social - Team Project

Jul 2024 - Dec 2024

Responsibilities:

- Developed client and admin pages for system management.
- Built front-end using ReactJS, TailwindCSS, and Redux for state management.
- Integrated Axios for API interactions and enabled image/file uploads, downloads, and real-time messaging with WebSocket, supporting file/image sharing.
- Built back-end using NodeJS (Express Framework) with JWT and Bcrypt for secure authentication, and global exception handling for reliability.
- Used MongoDB with Mongoose for efficient data storage and management
- Deployed the front-end on Vercel and the back-end on Render for seamless performance, set up CI/CD for back-end and front-end

Technologies used: Javascript, Restful API, MongoDB, ReactJS, NodeJS, TailwindCSS, Redux, WebSocket, Axios, JWT, Bcrypt.
